↘ Making a connection - answers

Main Hazard	Kinetic energy
Secondary hazards	Biomechanical energy (ergonomics)
People trigger	Fatigued, distracted
Plant trigger	Uncontrolled movement of handles (up or down)
Place of work trigger	Slippery floor, untidy workplace, cold weather
Planning trigger	Setting tongs on hard band
ID an incident	Tongs break loose from the pipe striking person
ID a consequence	Lost time injury
ID a prevention control	Never position yourself in tong swing radius – step away when driller pulls on them
ID an escalation control	Eyewash station in close proximity to drill floor to deal with objects in eye
